Description

Aims

This course provides an excellent opportunity to practice commonly performed nerve transfers in brachial plexus surgery.

Topics

The Course programme will include:

- Double Oberlin transfer
- Radial to axillary nerve transfer
- Accessory to suprascapular nerve transfer (posterior)
- Intercostal nerve harvest
- Supra-clavicular, infra-clavicular and trans-axillary brachial plexus approaches
- Clavicular osteotomy and fixation

Training Methods

Each topic will begin with a short preliminary lecture and a demonstration dissection prior to the dissection of each component by the registrants under the direction of the course tutors. There will be 10 work stations, each with one fresh frozen cadaveric specimen. Each participant will have the opportunity to operate on one arm and one side of the neck.

Maximum Participants

The first 20 registrations will be accepted. Subsequent applications will be placed on a waiting list in order of receipt.
