

2nd Endoscopic Pituitary Surgery Course

Adelaide, Australia

Friday 22nd of November 2024

3D printed anatomical sinus and sella models with realistic tissue allowing all steps for a transsphenoidal and transellar exposure, pituitary adenoma resection, CSF leak repair, ICA injury control and skull base reconstruction

Operative stations in a purpose built state of the art dissection lab in the centre of Adelaide

Morning lectures covering topics:

- Anatomical basis for the transsphenoidal transsellar exposure
- Surgical technique for resection of pituitary adenomas
- Management of major vascular injury in endoscopic skull base surgery

Afternoon dissections focusing on:

- Optimising the sinonasal corridor using 2 surgeon-4 hand technique with a colleague
- Completing a transsphenoidal and transsellar exposure
- Resection of a pituitary adenoma
- Repair of CSF leak
- Management of major vascular injury
- Enhance the learning experience by repeating the scenario with multiple models each with different tumour consistencies

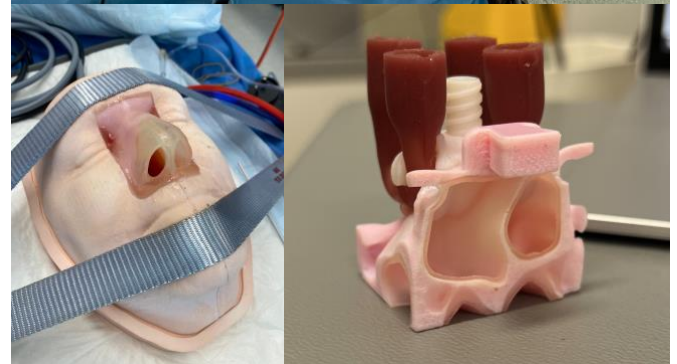

Course Directors:

Professor Peter-John Wormald
Professor Alkis Psaltis

Dr Nick Vrodos

Dr Stephen Santoreneos

With 8+ faculty ensuring personalised teaching experience
